

My wife and I must travel to work on I95, in the Washington D.C area, daily, Monday thru Friday. When I leave my home, I do not have to wait 10 minutes or more to get traffic and weather information from the local radio station. I choose to pay, YES PAY for this information from XM. I feel it is my right to be able to choose where I get this information, when I get this information, and from whom I get this information from! This service from XM has not stopped me from watching the news on the television, before I go to work. Nor has it stopped me from listening to AM and FM stations to get traffic, weather, music and talk radio, on the way to or from work. I use ALL of them! So why should the National Association of Broadcasters (NAB) be able to stop me from getting this information from XM???
